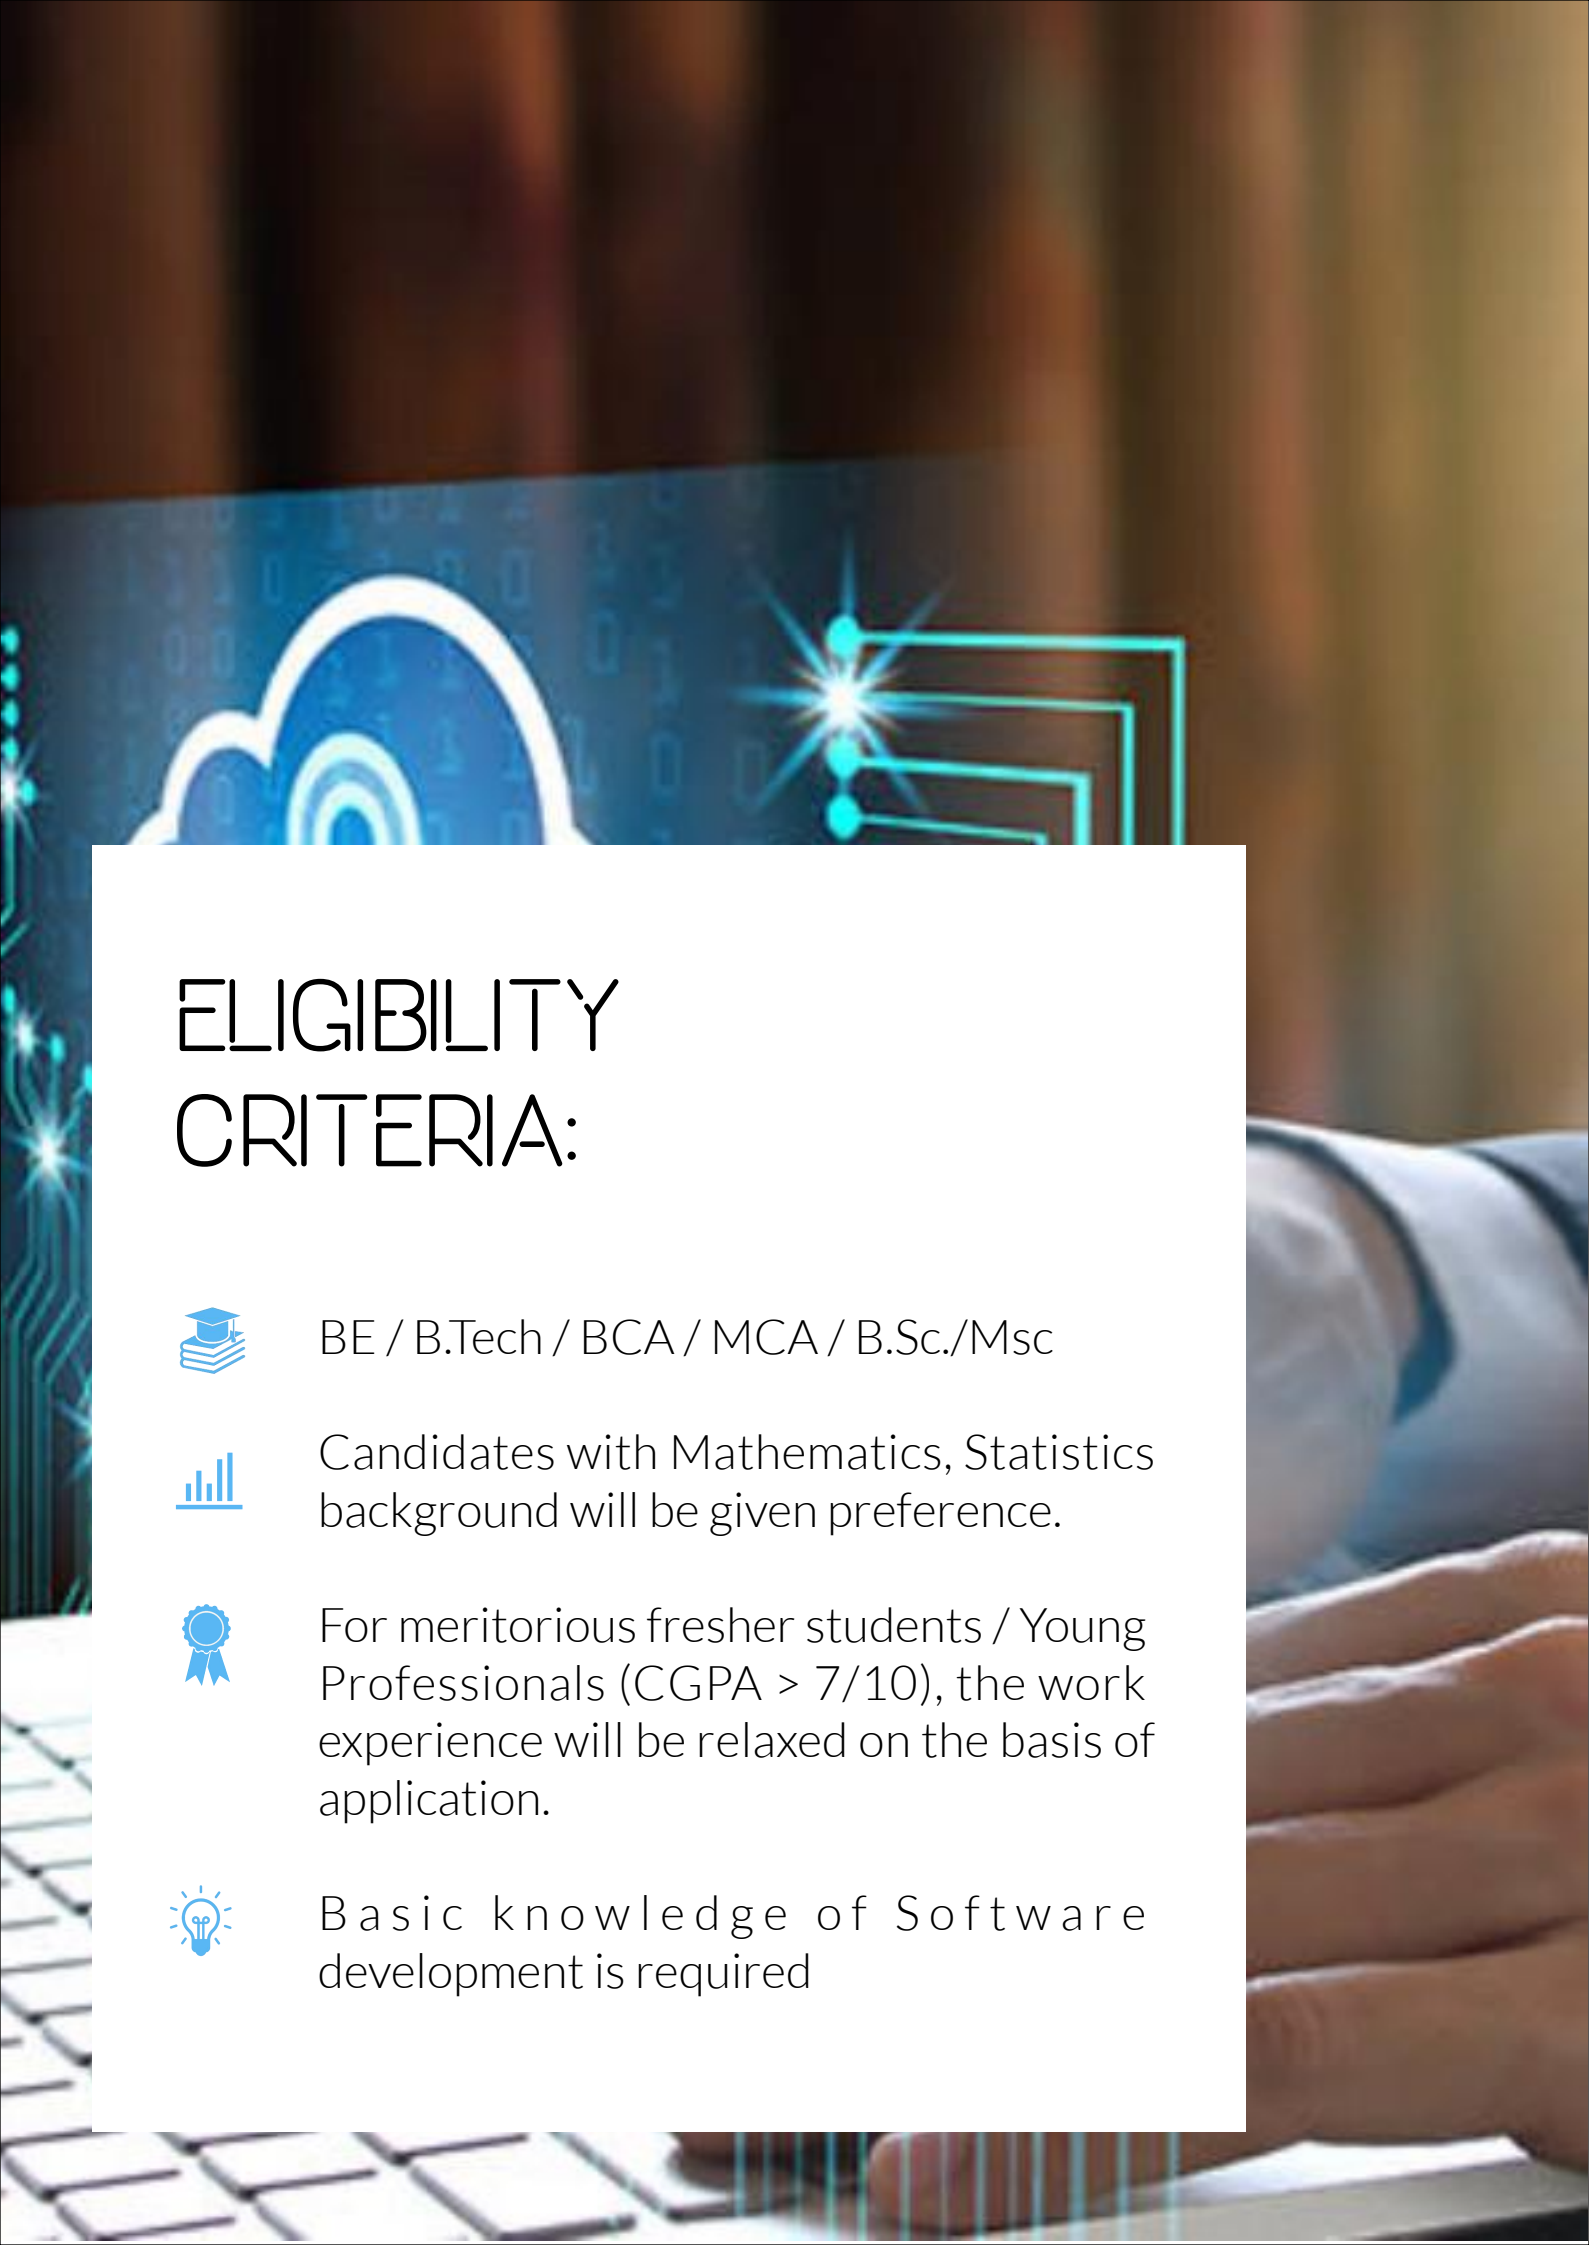
COURSE DESCRIPTION:

The Cloud Credential Council (CCC) Cloud Technology Associate™ certification enables professionals to operate effectively in a Cloud environment, demonstrating an understanding of the key concepts and relevant terminology. It works as the ideal foundation for those interested in advancing their careers with professional-level certifications.



ELIGIBILITY CRITERIA:

- BE / B.Tech / BCA / MCA / B.Sc./Msc
- Candidates with Mathematics, Statistics background will be given preference.
- For meritorious fresher students / Young Professionals (CGPA > 7/10), the work experience will be relaxed on the basis of application.
- Basic knowledge of Software development is required

LEARNING OBJECTIVES:

- Identify the fundamental concepts of cloud computing including business benefits and cloud terminologies.
- Identify the technical aspects (high-level) of virtualization including the role and benefits of hypervisors and containers and the different types of virtualization.
- Identify how emerging technologies (AI, IoT, 5G, RPA, Digital Twin, and others) enhance the capabilities of cloud computing, such as performance, security, and faster deployment.
- Define cloud security, governance, risk, and compliance and identify the risks/threats involved in cloud computing and the corresponding mitigation measures and best practices.
- List the strategies involved in the roadmap for cloud adoption and their implementation and migration for different cloud service and deployment models.
